Each year, more than 100,000 people in the U.S. are diagnosed with a form of lymphoma and chronic lymphocytic leukemia. That means every five minutes, someone is diagnosed with lymphoma.

The Lymphoma Research Foundation (LRF) has more than two-and-a-half decades of experience finding cures for lymphoma. LRF is committed to funding the very best science and serving the lymphoma community through education, support, and compassion.
2020 was filled with unprecedented obstacles and change, but through it all one thing remained constant – the Lymphoma Research Foundation’s (LRF’s) unwavering commitment to the lymphoma community. Since the onset of the COVID-19 crisis, we have been working tirelessly to adjust our programming and resources to best serve the patients and families who look to us for resources and support.

During the pandemic, funds for early-career scientists decreased, but we were proud to continue our commitment to these scientists and the lymphoma community by funding a full class of grantees.

In 2020, we celebrated 25 years of innovation and progress. We also celebrated supporters like you who help us continue to impact the broad continuum of lymphoma research and empower patients through education and support services.

Additionally, we launched an exciting new global research initiative in follicular lymphoma. Building upon the success of other LRF scientific initiatives and more than two decades’ experience convening world-leading experts for scientific workshops and consortia, the Jaime Peykoff Follicular Lymphoma Initiative is poised to change the research and treatment landscape for this disease.

As we continue to celebrate our 25th anniversary, reflect on our past, and celebrate our current achievements, we keep our eyes on the future — a world without lymphoma. We thank all of the patients, survivors, families, volunteers, and supporters like you, who have made all of our achievements possible.

Sincerely,

Meghan Gutierrez
Chief Executive Officer

Since 1995, LRF has been at the forefront of lymphoma research and patient care through a series of groundbreaking initiatives and programs. Here are some key milestones:

**1995** — Under the leadership of Joseph Bertino, MD, the LRF Scientific Advisory Board (SAB) was created to guide the LRF’s research portfolio. Today, the world-renowned SAB comprises leading lymphoma experts, nine of whom are former LRF grantees.

**1996** — The inaugural North American Educational Forum on Lymphoma was convened in California. Today, the Ed Forum is the largest lymphoma-specific conference for patients in the world and has inspired a series of regional and local LRF patient programs hosted year-round across the nation.

**2001** — Research led by various SAB members discovered that diffuse large B-cell lymphoma (DLBCL) is two distinct diseases, each with its own genetic profile.

**2003** — LRF’s Mantle Cell Lymphoma (MCL) Initiative was founded, making LRF the largest private funder of MCL research. The Initiative transformed the treatment and care of people with MCL.

**2008** — To expand its first-in-class lymphoma education programming, LRF developed Lymphoma Rounds, a professional education program specifically for those caring for lymphoma patients. The program debuted in Chicago, Ill.; today, Lymphoma Rounds is held in seven major U.S. cities.

**FINDING CURES STARTS WITH LRF**

25 YEARS OF INNOVATION AND PROGRESS
1995 was a significant year for the Lymphoma Research Foundation (LRF) — it was then that **LRF realized its dual mission: to eradicate lymphoma** — by funding innovative research guided by its world-renowned Scientific Advisory Board — and **to serve those touched by this disease** — by sharing research and treatment insights with the lymphoma community through national education programs.

**Finding cures starts here.** Through lymphoma-specific research grants and consortia, LRF seeks to understand the nearly 100 subtypes of lymphoma and support the development of new treatments. As a result, LRF-supported researchers have been involved in many of the most significant lymphoma breakthroughs witnessed in the past quarter-century.

**2017** — The first cellular therapy to treat lymphoma, **chimeric antigen receptor (CAR) T cell therapy**, was approved by the FDA for the treatment of DLBCL. In 2003, LRF had funded the first-ever study providing in vivo evidence that CAR T cells are effective in an animal model.

**2020** — LRF created the Jaime Peykoff Follicular Lymphoma (FL) Initiative, a $10 million endeavor to accelerate research and patient care for FL (read more about this Initiative on page 10).

**2014** — As a direct result of the efforts and research of a dozen LRF grantees and SAB members, the treatment of **chronic lymphocytic leukemia (CLL)** was transformed in a single year. The FDA approved four new therapies for the disease, making treatment possible for more patients than ever before and improving outcomes.

**2019** — Led by LRF, SAB, and MCL Consortium members, the **first-ever combination and chemotherapy-free treatment regimen** for patients with slow-growing forms of non-Hodgkin lymphoma was approved by the FDA.
IMPACT MOMENT

“Our goal has always been to empower patients to become their own health advocate, and to ultimately one day see a world without lymphoma. Over the past 25 years, LRF has gained a better understanding not only of lymphoma, but also of the effect it can have on those who receive a diagnosis.”

— Jerry and Barbara Freundlich
Founders and Directors Emeritus
Since its inception, LRF has made major contributions to the lymphoma research enterprise, awarding nearly $65 million in lymphoma-specific research grants. LRF’s disease specificity and hyperfocus on finding cures for every type of lymphoma ensure the next generation of cancer researchers dedicate their careers to studying lymphoma and that world-leading lymphoma experts collaborate and accelerate the pace of scientific discovery.
MEET OUR 2020 RESEARCHERS

**Pamela Allen**
Emory University/Winship Cancer Institute

**Research Study:** Mogamulizumab and ECP for the Treatment of Sezary Syndrome and Mycosis Fungoides

**Lymphoma Focus:** T-cell lymphoma, mycosis fungoides, primary cutaneous T-cell lymphoma, Sezary syndrome

$10 MILLION COMMITMENT TO ACCELERATE FOLLICULAR LYMPHOMA RESEARCH AND PATIENT CARE

The Lymphoma Research Foundation (LRF) will convene the world’s experts in follicular lymphoma (FL) research and patient care and drive investment in clinical research, thanks to a $10 million gift from the Peykoff family and Niagara Cares. The generous gift establishes the Jaime Peykoff Follicular Lymphoma Initiative in honor of Jaime Peykoff, an FL survivor and the wife of Niagara Bottling owner Andy Peykoff II.

“We are so very impressed by the Lymphoma Research Foundation’s extensive background in partnering with world-leading experts to advance the field of lymphoma research as well as the caliber of its Scientific Advisory Board,” says Jaime Peykoff. “We also loved their commitment to investing in early-career scientists to help push forward the pace and openness of lymphoma research. We are very excited to see what will be uncovered and accomplished with this new disease-focused initiative. It’s going to be a great journey!”

“We also loved their commitment to investing in early-career scientists to help push forward the pace and openness of lymphoma research.”

Follicular lymphoma is an indolent (slow-growing) form of non-Hodgkin lymphoma (NHL) and remains an incurable and continuing challenge for researchers and clinicians. While most patients respond to the current standard of care, many will require treatment throughout their lifetime; the inability for some patients to achieve a complete remission and the early progression of disease in others can both result in poorer long-term outcomes.

Through the Jaime Peykoff Follicular Lymphoma Initiative, LRF will mobilize the research community to better understand FL, accelerate therapeutic development, and bring innovations and advances to patients who require them faster and more efficiently.
“The Lymphoma Research Foundation seeks to eradicate this disease by supporting innovative research and the development of new and improved treatments for lymphoma. Direct investment in cutting-edge science is the primary way we advance our mission,” says Meghan Gutierrez, LRF Chief Executive Officer. “This generous gift will allow us to develop and provide the critical tools and resources necessary to meaningfully advance the study of follicular lymphoma and impact patient care.”

LEADERSHIP

LRF assembled a Steering Committee of FL experts to provide thought leadership for the Initiative. This multidisciplinary, multi-institutional panel will ensure all key stakeholders are informed of the Initiative’s goals and identify the most significant unmet needs in clinical FL research. The Steering Committee will also work with LRF to develop collaborative partnerships with other research institutions and organizations to maximize the Initiative’s investment.

The Steering Committee will also work with LRF to develop collaborative partnerships with other research institutions and organizations to maximize the Initiative’s investment.

INTERNATIONAL FOLLICULAR LYMPHOMA SCIENTIFIC WORKSHOP

Building upon more than two decades’ experience as a convener of international scientific consortia and disease-specific research workshops, LRF will develop and convene an international Scientific Workshop intended to drive collaboration, which can often lead to scientific breakthroughs and prevent duplicative use of resources. Follicular lymphoma thought leaders will share early research findings, discuss the results of pivotal clinical trials, and engage in planning exercises designed to advance FL research.

CLINICAL RESEARCH GRANTS

LRF is committed to funding the most promising lymphoma researchers who have the greatest potential to improve patient care and ultimately, to improve patient outcomes. Under the expert leadership of the Jaime Peykoff Follicular Lymphoma Initiative Steering Committee and the LRF Scientific Advisory Board (SAB), LRF will fund FL research through two programs: the LRF Clinical Investigator Career Development Award for early-career researchers and a Disease Focus Area award focused on FL for senior faculty researchers.

“Amidst the continuing COVID-19 pandemic, many scientific research labs across the country were forced to shut down, and funds for senior and early-career scientists continue to decrease,” says Gutierrez. “We are proud to continue our commitment to the lymphoma community by offering these additional grants within our research portfolio. We thank our supporters, like the Peykoff family, for making this important work possible.”

This full article is published in the Fall 2020 edition of Pulse, a publication of the Lymphoma Research Foundation.
“LRF’s early funding enabled us to begin to translate innovative concepts into groundbreaking therapies that improve the outcomes of mantle cell lymphoma patients.”

— Selina Chen-Kiang, PhD
Weill Cornell Medical College. Three-time LRF Grantee
LRF’S COVID-19 RESPONSE
SUPPORTING THE LYMPHOMA COMMUNITY

"Hearing the latest information on COVID-19, lymphoma treatment options, and research helps patients cope during these challenging times," says Sarah Quinlan, Senior Director of Programs and Strategy at the Lymphoma Research Foundation. "Each day can present new obstacles, especially for those living with lymphoma, and we want to support patients by giving them access to medical experts."

SUPPORTING THE MOST VULNERABLE

The COVID-19 pandemic swept the world and disrupted the way we interact, communicate, conduct business, and live. As the pandemic began to unfold, LRF quickly responded by coming up with new and creative ways to meet the needs of the lymphoma community.

PIVOTING TO VIRTUAL EDUCATION

As an immediate response to COVID-19, LRF hosted a webinar in March 2020 featuring LRF Scientific Advisory Board (SAB) member John P. Leonard, MD (Weill Cornell Medicine), who shared what lymphoma patients need to know about the virus. Due to the high demand for resources and education around the virus, LRF expanded its COVID-19 webinar offerings to include topics on managing concerns for lymphoma patients in treatment and understanding telemedicine. LRF also hosted its first virtual Ask the Doctor About Lymphoma and Lymphoma Workshop educational programs in the Spring, bringing these hallmark educational events into the safety of people’s homes.

To further support the lymphoma community during the pandemic, LRF sought to address the added financial burden related to the virus. Aside from the already overwhelming costs that are often associated with cancer, many people contacting the LRF Helpline this year reported that COVID-19 made the issue worse.
LRF’s Patient Aid Program is a cornerstone resource for people undergoing treatment for lymphoma. The program provides limited financial assistance to lymphoma patients to help cover the cost of out-of-pocket expenses associated with their care. In direct response to the increased need, LRF expanded its Patient Aid Program to create a COVID-19-specific financial assistance grant program, helping those impacted financially by the virus and lymphoma.

SOCIALLY DISTANCED FUNDRAISING

COVID-19 also had a significant impact on nonprofits’ ability to fundraise. When it became clear that the virus would impact public gatherings, LRF’s Distinguished Events and its Peer-to-Peer fundraising teams began to rethink LRF’s signature fundraising events, including Swirl: A Wine Tasting Event, the annual LRF Gala, and the Team LRF Lymphoma Walk series and LRF Research Ride.

Swirl: A Wine Tasting Event offers attendees the opportunity to taste and enjoy a collection of wines, participate in a silent auction, and raise money to support LRF’s mission. In an effort to bring this event into the comfort of people’s homes, the traditional in-person event pivot to a two-episode tasting series held in the spring and fall called Swirl: America. The events featured prominent beverage brands, cocktail mixologists, and an opportunity to learn about wines from the Santa Ynez Valley wine region in California.

LRF’s largest formal event, the annual LRF Gala, was held virtually as well, marking its 25th anniversary. The “Finding Cures Starts with You” 25th Anniversary LRF Gala brought together leaders in the lymphoma community — including health care providers, researchers, corporate partners, patients, survivors, and volunteers — to celebrate and pay tribute to those making an impact in lymphoma research and patient care. For the first time, the Gala was live streamed for registered attendees and archived for public viewing on LRF’s YouTube channel.

The Team LRF Lymphoma Walk series and Lymphoma Research Ride raise critical funds for lymphoma research programs and provide an opportunity for the lymphoma community to come together for a special day of celebration. In 2020, LRF hosted its first-ever Facebook Live fundraising rally, Rally On! America, to bring the lymphoma community together during a time of social distancing. In addition, the traditional Lymphoma Research Ride held in Maryland transitioned to a virtual bike ride fundraiser, offering all cycle enthusiasts around the country an opportunity to participate and join a national movement.
IMPACT MOMENT

“Rally On! America gave me and my family the opportunity to interact with my fellow survivors and other members of the lymphoma community, which has even more meaning during this global pandemic. I’m glad to have an organization like LRF to support and comfort me — as well as lymphoma patients and their loved ones — during these most difficult times.”

— Dexter Neal

PEER-TO-PEER SUPPORTERS

LRF is grateful to the following fundraising teams that contributed to the success of the Foundation’s peer-to-peer fundraising events throughout the 2020 calendar year.

**2020 ARIZONA LYMPHOMA WALK**

- Beat It:
  - Captain, Nancy Allis
- BrewCrew for Connie:
  - Captain, Natalie Brewster
- Memory of Max Allen:
  - Captain, Linda Allen
- Team Daisy Strong:
  - Captain, Daisy Hernandez
- Team Ed:
  - Captain, Ellen Finney
- Team Markley:
  - Captain, Ronald Markley
- Team Mayo Clinic Lymphomies:
  - Captain, Eileen Reali
- Team NXP:
  - Captain, Bob Kenney

- Remembering Dan’s Journey:
  - Captain, Ashley White
- Rob’s Warriors:
  - Captain, Pam Salvesen
- Ryan & Sandy’s Angels:
  - Captain, Holly Grybas
- STICKWALKERS:
  - Captain, K. Bruce Stickler
- Team Janice-Never Forget:
  - Captain, Kimberly Romic
- Team Mendy:
  - Captain, Cheryl Mendelson
- Team OBIE:
  - Captain, David Oberst
- Team Papa:
  - Captain, Eden Jacoby
- Team Sarnoff:
  - Captain, Mona Sarnoff
- Team SeaGen:
  - Captain, Christina Piper

**2020 CHICAGO LYMPHOMA WALK**

- #Support Team:
  - Captain, Debra Gelman
- Bannon Bunch:
  - Captain, Annette Bannon
- Brisk Warrior Walkers:
  - Captain, Marla Briskman
- CureFunders Team
- Ed Brennan:
  - Captain, Kathleen Walsh
- Hike for Mike 5.0:
  - Captain, Almee LaPherre
- Jack’s Pack:
  - Captain, Hillary Linden
- Jammin’ for Lymphoma:
  - Captains, Ryan & Rhiannon
- Karen’s Crusaders:
  - Captain, Jessica Quinn
- Laura’s Loony Lymphomettes:
  - Captain, Laura Tepper
- Los Morelianos:
  - Captain, Luz Maria Ramirez-Morgen
- Nancy and Tony’s Cancer Fighting Ninjas:
  - Captains, Nancy Tran & Tony Chin
- Peggy’s Pacesetters:
  - Captain, Peggy Levine
- PwC LRF Team:
  - Captain, John Pearl

**2020 DALLAS LYMPHOMA WALK**

- Lymphomaniacs 2020:
  - Captain, Larry Postel
- Team Briggs:
  - Captain, Ronetta Briggs
- Team Crane:
  - Captain, Marilyn Crane
- Team Riordan:
  - Captain, Sydney Riordan
- Team Jon Ross:
  - Captain, Jon Ross
- Team Tommy:
  - Captain, Leigh Olson
- Wendy’s Eagles:
  - Captain, Wendy Harpham

**2020 HOUSTON LYMPHOMA WALK**

- Hodgkins Smodgkins:
  - Captain, Dexter Neal
